Profile

Undergraduate student at Sogang University majoring in Political Science and Diplomacy with a double major in Economics. My academic interests lie at the intersection of macroeconomics, financial markets, data analysis, financial regulation and compliance, and economic law. I am pursuing career interests in public financial institutions alongside preparation for law school.

Leadership and Appointments

President	May 28, 2026 - Present
Sogang Lawve, Sogang University Law Society	Sogang University
• Lead the academic and administrative operations of Sogang University's law society, coordinating study sessions, discussions, research activities, and internal affairs while overseeing communication among members and the society's academic development.	
Co-Founder & Co-President	Aug. 2026 - Present
Quest - University Students' Consortium Finance & Investment Society	Seoul, South Korea
• Leadership & Operations: Co-founded and lead a cross-university finance society with members from five universities, overseeing recruitment, organizational operations, and external coordination under the guidance of faculty advisor Dr. Ian Sutherland.	
• Academic & Program Design: Designed and oversee the society's curriculum and project-based activities covering accounting, macroeconomics, corporate valuation, fixed income and derivatives, financial regulation and compliance, and risk management, with practical applications through equity research, Excel/Python-based financial analysis, and stock-pitch presentations.	
Research Assistant	Feb. 2025 - Present
Korean Gender Politics Research Group	Seoul, South Korea
• Assist with research on gender politics, political representation, and electoral behavior, including literature reviews, data organization, and preparation of research materials for ongoing projects.	

Selected Research Projects

Automated Economic News Briefing System Fall 2026

A project designed to collect economic news articles automatically and convert them into structured, reader-friendly reports. [Project Link]

- Designed an RSS and webpage-based article collection pipeline.
- Organized economic and financial news into thematic summaries.
- Explored automated report generation in PDF or text format.

Local Roots and Electoral Success in South Korean Legislative Elections 2025

Individual quantitative research project on candidate localism and electoral performance.

- Constructed a candidate-level dataset of 693 district candidates in the 2024 National Assembly election.
- Measured local roots using birthplace and school-location data, and proxied residential ties using publicly disclosed property records.
- Estimated OLS and linear probability models with province fixed effects and HC1 robust standard errors.
- Found that the electoral effects of local ties vary by type of connection, suggesting that "local candidate" is a multidimensional concept.

Exposure to Female Politicians and Voter Turnout 2026

Co-authored quantitative research project on female descriptive representation and political participation.

- Combined 2006 municipal candidate data, 2006-2010 gender- and age-specific turnout data, and KOSIS local controls.
- Used an instrumental variables strategy based on Korean alphabetical ballot ordering in the 2006 municipal legislative election.
- Estimated OLS and IV models to test whether female elected officials increased women's turnout in the following election.
- Found no robust evidence of a turnout-increasing effect, highlighting the importance of electoral visibility and political context.

YouTube News Thumbnail and Metadata Collection 2025

A data project collecting thumbnail images and video metadata from major Korean news YouTube channels.

- Collected video metadata using the YouTube Data API v3.
- Automated thumbnail image downloads using Python.
- Organized variables such as views, likes, comments, upload dates, and video duration.
- Explored image-based regression and content performance prediction.

Honors and Awards

-
- Dean's List, College of Social Sciences, Sogang University - Fall 2023, Spring 2024, Fall 2024, Spring 2025
 - President's Award for Highest Academic Achievement - Fall 2024

Awarded to students in the top 1% of academic performance.
